Introduction, and Summary of our aims:

-Simply put, This is a pack trading thread, OUR CARDS for YOUR PACKS.

We, the Top Cut Trading Inc. are small group of friends and traders with a big aim. We want to use our expansive collections for the good of the community; and try to meet collectors and players diverse range of needs, in exchange for Booster Packs (which act effectively as a trade currency).

This thread is updated almost daily to reflect the public supply and demand of our traded cards/items. This is in order to ensure that you can feel comfortable using the values of this thread to get proper value out of your cards, and to ensure that all our traded cards are traded at what we perceive to be the fairest value.

We almost always are able to offer a discount on large orders, as long as the cards are not all ** rated or HGSS-era. If needed and requested we will also add evolution lines to your ordered card, normally at no extra cost, unless the card is pre-NXD or has a greater value for some other reason.

If there is any unlisted card that you wish to inquire about please ask on the thread. Should you have any questions, complaints, or issues with a particular trader on the thread, please contact me in game, and I will try to find a solution if possible.

If you are looking on guidance for how to complete a trade, general rules and guidelines, or information on card rarity. They are now all located below the Value Guide; please see the contents section for more details.

Pack Ratios:

It is important to note that as a result of some packs being in significantly higher demand/lower availability than others, different packs may well have different ratios in relation to the values located on the thread Value Guide.

The list of packs and their respective ratios, in comparison to what we term One 'standard' Pack (which means the value which is stated next to the card in the 'Value Guide'), are located below.

We hold the right to change these ratios at short notice if necessary, and different traders may have slightly different ratios; but this will be made clear to you before completing a trade with them 😊.

Number of Each Type of Pack: One 'standard' Pack (how many packs are necessary to equal the value of one 'standard' pack)

-A Standard Pack is the value listed next to the card

Examples:

Example 1: *If Mewtwo EX NXD Regular had a value of 5 'Standard' Packs then it would cost*

10 Flashfire packs, (because $5 \times 2:1 = 10$)

Example 2: You would need 3 Primal Clash Packs to equal the value of 2 'Standard' Packs.

(because $2 \times 1.5 (:1) = 3$)

Example 3: You would need 4 Legendary Treasures Packs to equal the value of 2 'Standard' Packs. (because $2 \times 2 (:1) = 4$)

Example 4: You would need 4 Dark Explorers Packs to equal the value of 5 'Standard' Packs. (because $4 / 0.8 (:1) = 10$)

Not Currently Accepted: Charizard-Themed Avatar Collection box

Number of Pack Needed to Equal [1] : Thread 'Standard' Value [1] (RATIO)

0.5:1 HeartGold & SoulSilver, Unleashed, Undaunted, Triumphant, Call of Legends (An adjusted ratio for ^{**} rated or some Legacy-era cards, e.g. 0.8:1)

0.67:1 Plasma Freeze, Dragon Vault (An adjusted ratio for ^{**} rated cards, e.g. 0.9:1)

0.8:1 Roaring Skies (An adjusted ratio for ^{**} rated or some Legacy-era cards, e.g. 1:1)

0.9:1 Noble Victories, Dark Explorers (An adjusted ratio ^{**} rated cards, e.g. 1.1:1)

1:1 Black & White, Next Destinies, Dragons Exalted, Boundaries Crossed , Next Destinies, Plasma Storm, Plasma Blast, Double Crisis, Generations (These packs may not be accepted for some ^{**} rated or Legacy-Era cards; or only at an adjusted ratio e.g. 1.25:1, 1.5:1, 2:1)

1.33:1 Steam Siege (These packs may not be accepted for some ^{**} rated or Legacy-Era cards; or only at an adjusted ratio e.g. 1.5:1, 2:1)

1.5:1 Ancient Origins, Emerging Powers, Phantom Forces, Primal Clash, BREAKthrough, BREAKpoint, Fates Collide (These packs are not accepted for ^{**} rated or most Legacy-era cards; might have an adjusted ratio)

1.75:1 Legendary Treasures, Furious Fists (These packs are not accepted for ^{**} rated cards or most Legacy-Era Cards; might have an adjusted ratio)

2:1 Flashfire, X&Y (These packs are not accepted for most ^{**} rated cards or Legacy-Era Cards or might have an adjusted ratio)

8:1 Pikachu-Themed Avatar Collection Box (These packs are not accepted for any ^{**} rated cards or Legacy-Era Cards, or on trade-by-trade basis).

Other Uncommon Chests are accepted as trade-in for 0.5 value Trainers/Rares. Or for some other cards in select circumstances.

Vetoos and Exceptions:

Trade Veto: We will try and help you with whatever we can... but due to the increasing rarity of these cards and changes to the trading system, we **withhold the right to veto (reject) any orders for cards from HS-NV, Gameplay Items, ^{**} rated or any other cards**, even if they are listed on the front page.

Differing Ratios: For certain cards, some traders may operate a different ratio, or reject the usage of certain Packs. This doesn't normally happen, but could occur particularly in trades for ^{**} rated and HGSS/BW-era cards.

Differing Values: Trade values may vary throughout the day and are **conducted on a trade-by-trade basis** traders may need to offer a different value to the ones listed by other Top Cut traders, as the markets (particularly for pre-XY cards the market is currently very versatile and subject to change even at short notice).

Value Guide:

The Top Cut Trading Inc. Value Guide is the largest and most comprehensive Value Guide available; featuring our trade values for all notable Pokemon, Trainers and Energy (as well as value ranges for most unlisted cards).

Our Value Guide also features within itself the most detailed list of available Promo cards (as well as a reference guide to currently unobtainable cards) as well as a large exclusive section dedicated to the rare HGSS-era cards.

To see our guides for Gameplay Items (Coins, Sleeves & Deck Boxes), then please head down below the Guidelines section of the thread to the Gameplay Corner. The list of Unobtainables, and other points of reference are located there also.

If you can't find something, please consult the Contents page of the thread; or if you have any questions or queries don't hesitate to ask.

The XY Era:

The XY-era, consisting of sets from XY (Base Set) onwards, saw the introduction of the exciting new Mega Evolution mechanic, Team Flare Tools, and a number of exciting new Pokemon and strategies, which would go on to shape the current state of the game across the formats.

The BW Era:

The BW era, which coincided originally with the launch of PTCGO all the way back at Black & White Base Set was an exciting period for all TCG fans alike. It saw the introduction of Full Art cards for the first time, and also the first ever Pokemon with special powers known as Abilities.

It also saw from Next-Destinies onwards, the re-introduction of the powerful Pokemon-EX; which would play a major role in the TCG metagame from then onwards, with their powerful attackers and massive HP making them some of the strongest in the game.

HGSS Corner

As the cards from this era are from Booster Packs no longer available for redemption (previously available through the discontinued "Booster Credits") these cards are subject to higher values due to their increased rarity and high demand among both collectors and Unlimited format deck builders.

Despite all this the Top Cut has the largest and most comprehensive guide to the current values of these cards in the game, and will be able to stock you with almost your needs at the fairest and cheapest values that we can (though due to a lack of stock, and their considerably high rarity we cannot guarantee that we have all of these cards in stock, particularly those with certain artworks, such as Reverse Foil).

Values are very varying dependent on both their playability and how rare they are, so these are subject to change at very short notice, but all changes made will be available for viewing in the change log. We thank you for understanding, and hope that we will be able to help in any way that we can with your TCGO card needs.

The Trainers Clubhouse

Its no time for tea and a biscuit.. it's time to trade for some Trainer cards to build your decks and add to your collections! That's right, welcome to the Trainer's Clubhouse which houses the value guide for all the commonly used/desired Trainers (Items, Ace Specs, Supporters, Tools and Stadiums) with the most comprehensive guide you will find anywhere on the Forums.

If you are looking to find trainers from the HGSS-COL sets, the comprehensive list of those cards available are available in the HGSS Corner of the thread, which is located above this post. If you have any questions or queries, then don't hesitate to ask; either I or another member of the trading team will be happy to help.

The Gameplay Corner:

In this section of the thread, we have our Value Guide for all obtainable Coins, Sleeves and Deck Boxes and their trade values. Massive thanks go to our Director of Trading, Mefftu, for helping to create and sustain this area of the thread!

Due to the incredible rarity of a select few gameplay items, we are unable to supply the items marked 'NFT' on normal occasions* (although, it is possible that some of these may become available from time to time).

We also have the right to veto trades here, and also raise/alter values at short notice because of the volatility in the market (we are at time of writing one of the only Incs. to offer most of these) 😊. This might also mean a limit on the number of items you can order at once, although we will try to help you as much as we can.

PTCGO Unobtainables:

For the sake of safe keeping, and ensuring that this post is updated regularly to keep information up to date, this thread will now be merging with the Top Cut Trading Inc.

This also ensures that this information will always be readily available to players both new and old on the first page of the PTCGO Trading Section, for the sake of convenience, without needing to continually bump the thread.

As you probably already know there are several cards (and various other gameplay and avatar items) programmed into the game that aren't currently obtainable, as far as we know. With the recent introduction of the new Trading Wheel upon completing a PVP Ranked game and the Gem Store, some of these have become obtainable, but many are still temporarily unavailable.

This thread is hopefully going to be able to inform the community about the introduction of any new items to avoid confusion, and also prevent anyone from getting ripped off via public or private trades for newly released cards (and simply save many traders who spend a long time each day offering trades for stuff that is simply impossible to get ahold of).

I monitor public trades often as part of my role in the Top Cut Trading Inc. to try and keep our values as fair and up to date as possible, and this enables me to keep things up-to-date and inform you about any changes in availability of certain items ASAP. Having said that I will need your help in keeping things up to date, and as this thread is to serve the whole

community I would be grateful of any feedback about what other useful sections you would like to see in this section of the thread!

Whilst I promote discussion and involvement within the community, please try to avoid derailing the thread and having any arguments, after all it is just a game and the last thing I want is people falling out over such trivial things as a difference in opinion.

Reference Guide, and Other Regulations:

Completing a trade:

First of all you need to **check the thread to find out the necessary value of the card you want** , to decide whether you wish to trade for that particular card. You can find the cards of the thread easily by pressing "Ctrl+f " on your computer and then placing the name of the card you are looking for into the search bar that will appear on the screen, and pressing Enter.

If you aren't sure which cards you want (this may seem unusual to older players; but newer members of the game may be unsure as to what deck that they want to build, as well as which cards they should use) then do not be afraid to contact me or one of the other authorized traders in game, we will all be happy to help and advise you.

If you want deck help, then just create a Forum thread of your own in the Deck Help section, then more players will be able to give advice to improve your deck and make it stronger, so you will know which cards to look for.

Once you have found the cards that you want to trade for, you can **Post a Reply on the thread** (by pressing the 'Post a Reply' button at the bottom of any post) and then record it in a similar manner to the sample post below, which will **make it clear which cards you want, their value in Booster Packs, and which packs you want to use.**

Sample Post:

Quote

*Hey everyone! I'm looking for the following cards, does anybody have them 😊?
 2 Darkrai EX (DEX, Regular Art) (2 x 5)
 4 Dark Patch (4 x 1)
 2 Sableye (2 x 0.5)
 Total is 15 packs - I would like to pay in 6 PLB, 6 PLF, 3 BCR packs please! 😊*

Finished? Congratulations, you have made a trade request and now you just need to complete the trade. Just follow a few more simple steps, and you will be on your way to Pokemon paradise!

While you **wait for myself or any other "Authorized Trader" to respond to your trade** request please **tag your packs for trade**, by finding the packs in your collection, and clicking the button with the two arrows so that it lights up and changes colour.

We may offer a discount at this stage, dependent on which cards you have ordered, and the size of the order, but you are not able to award yourself discounts.

One of our trading team should send you the offer quickly, or contact you in game to sort out the trade. If someone fails to do so please find one of us in game and ask us directly if needed. Otherwise feel free to re-post that you have yet to receive help or to answer to any questions. We aim to get to you as quickly as we can, but sometimes it can be difficult for a variety of reasons so please try to keep patient.

Instead of waiting for the trade to be sent to you, **you are more than welcome to send your trade yourself**, as me and many other members have a large binder of cards already tagged for trade. Please **bear in mind though that we may not all have the exact quantity of the particular card you are looking for**, so I recommend PM'ing the player to whom you are sending the trade in game before doing so.

Please try to organize your trades neatly and double check your values, as it will save us a lot of time at our end when it comes to reviewing your orders. Also please respect the wishes of the person trading with you. What they want to accept in the end will be the choice of them and them alone.

Notes, and lists of abbreviations:

1. **Non-Foils (NF)**-Nothing on the card is unique, just a normal card.
2. **Regular Foils (RegF/Holo/Foil)**-The art of the card has a foil effect, but nothing else.
3. **Reverse Foils (RevF/RH/Rev)**-The card itself has a foil effect, except for the art.
4. **Full Arts (F A)** cards will have versions where the art takes up the whole card.

5. **Promotional Cards (Promo)**-Cards obtained via special promo codes. Available in some merchandise & also given out by TPCI at times. The values on these cards vary greatly. Some of these are amongst the rarest cards in the game.
6. **Secret Rares(SR)**-Certain cards will have a golden and shiny, secret rare version.
7. **League Cards (LC)**-Unlocked via codes obtained by attending league events. The value of these cards also varies but they are usually higher than regular set cards of the same prints value. Some of these cards can also be somewhat difficult to obtain.
8. **Pokemon Extra (EX)**-Basically any pokemon that has an EX after its' name. Generally they only come Regular, Promo or Full Art.
9. **Mega Evolutions (Mega EX)**-The next step after EX cards. These cards must be evolved from an EX pokemon and cause your turn to end.
10. **Pokemon Prime (Prime)**-Rare cards from HGSS era sets usually distinguishable by the special border (with the appearance of spikes) around the art.
11. **Pokemon Legends (Legends)**-Rare Legend cards obtained from HGSS era sets. You can easily tell these cards apart because the names will contain 2 Pokemon (E.g. Raikou & Suicune Legend) and each Legend Set will contain 2 halves to the full card.

Some cards may cost additional value:

If the trader wishes for cards to be specific versions we reserve the right to ask extra value in certain cases. As some but not all of these cards can be much harder to obtain than other more common versions of them. This will only be in effect for SELECT RegF, RevF, Promo & League cards. If you are on a budget other versions of some cards may be available for a lesser value.

If you prefer a specific version of a card just let us know, we have a fairly large amount of cards on hand, so will try to help you if we are able to. Values for Full Arts, Secret Rares & Other high value cards from packs should already be listed though. If you have any other questions please do not hesitate to ask.

All cards with '*' noted by the value may not be discounted, even in a larger trade ; as it is often difficult to keep up with the demand on these rarest cards. This restriction might also apply to other rarer cards, such as those from the HGSS-era.

Okay sorry about the wait I have been dealing with a big order in game just now 😊. I think I should be able to handle most of this trade (although I currently only have one Dragonite EX in stock). But I will need to contact you in game to sort out which packs you are offering 😊. Thanks for your understanding.
